# Newly developed way to open a zipper!

No need of pulling down the slider!

The "Quick Release Zipper" allows users to release the zipper by simply pulling apart the garment from both sides of the zipper. Also, unlike conventional zippers, you can open the zipper quickly with one hand.

## How to use

### Pull

Pull apart your garment from both sides

### Release

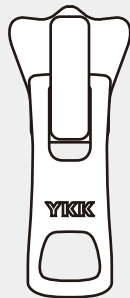

By pulling, the slider will come off of the element.

Open **QUICKLY** and **EASILY** like a snap!

## Item Information

Size	Chain Type	Classification	Slider
05	VI	Open / Two-way	NAMR1 / NAML1

Regular

Quick Release

## Special Slider

Asymmetrical Shape

Plastic Slider

to pull apart quickly

## Care Information

- Please conduct a field test.
- There is a possibility that the zipper might open unexpectedly if used on a heavy weight garment.

**For more detailed information and actual sample, please ask YKK sales representative**

## Caution

If you try to open a regular zipper in the same way, you might damage the zipper.
